AGENT FOR --

Massey Harris Farm Implements.

Local and General

Mr. and Mrs. E. S. and Mrs. W. McRory travelled by car to Calgary on Saturday last.

Private J. Todge was visiting old acquaintances during the week end.

Miss Marian Williams and Miss Peggy Johnstone, of Calgary, spent the week end with Mrs. E. Edwards.

Mr. and Mrs. Bray, Billy and Miss A. Whitfield visited Calgary on Saturday, travelling by car.

Mr. Colin Wigle wishes to thank his neighbors for the kind assistance they rendered him last Sunday when his granary caught fire.

Mr. T. T. Edmonds will address the United Farmers of Alberta in the Sunshine School District, on U.F.A. Sunday, May 21st, at the hour of 3 o'clock p.m.

Mrs. Whilans made a visit to Calgary on Monday.

Mrs. Wilson McRory journeyed to Calgary on Monday and returned on Tuesday.

Mrs. R. L. Boyle and Jimmy were visitors to Crossfield a few days this week. Jimmy looked quite smart in his khaki uniform.

Arbour Day seems about to pass as usual in our town—unnoticed. In Calgary about 1,500 trees are to be planted. Something of the kind might be done here, it would take the barren appearance off, and look as if somebody took an interest in the place. The village dads ought to take the matter up.

A water diver with the British army has up to the present found 32 springs. He's more lucky than some of us, 32 times we thought we had found one spring, and each time it has turned out s(n)o w good.

Our local tennis courts are being put into shape and the committee hope to have them open for play in the course of a few days.

Special Service of the U.F.A. will be held in the Union Church, Crossfield, on Sunday afternoon, May 21, at 3:30 o'clock. Mr. F. M. Black, of Calgary, will address the meeting. Remember the date and hour.

Mr. and Mrs. Stevens made a business trip to Calgary by the early morning train on Thursday.

Dick Ontkes paid another visit to Calgary on Thursday morning.

Mr. and Mrs. Gilchrist journeyed to Castairs by car on Wednesday evening, returning same night, they were overtaken by our annual May snowstorm.

Mr. and Mrs. E. S. McRory and Mr. and Mrs. Halliday made a trip to Calgary by car on Thursday evening. The snowstorm did not daunt their spirits they went through it half or snow.

The Prize List for Crossfield Fair for 1916 is near completion and will be in the hands of Mr. J. Cavander the Secretary, for distribution in a few days.

I OWE MY HEALTH

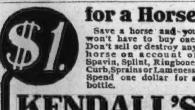

To Lydia E. Pinkham's Vegetable Compounds.

Washington Park, Ill.—"I am the mother of four children and have suffered with frequent headaches, nervous spells and the blues. My children's loud talking and romping would make me feel sick. I could just tear everything to pieces and I wouldache all over and feel so sick that I would want to die. I wrote to Lydia E. Pinkham's Vegetable Compound and Liver Pill restored me to health and I want to thank you for the good they have done me. I have had quite a bit of trouble and what it does affect you, you can look to friends. 'Where do you look so young and well?' I owe it all to Lydia E. Pinkham's remedies."

—Mrs. ROY STOREY, Moore Avenue, Washington Park, Illinois.

We wish every woman who suffers from frequent, troublous nervous attacks or the blues could see the letters written by women made well by Lydia E. Pinkham's Vegetable Compound.

If you have any symptom about which you would like to know write to the Lydia E. Pinkham Medicine Co., Lynn, Mass., for helpful advice given free of charge.

KENDALL'S SPAVIN CURE

has been a great many horses—has them back to health again. The results are given up. Over 30 years of success have been obtained by Dr. J. H. Kendall, Geo. Stetzel's Garden Plain, Alta., who has had your KENDALL'S SPAVIN CURE and it is now a household name. Dr. J. H. Kendall's Spavin Cure at \$1.00 per bottle, 6 bottles for \$5.00. A treatment on the hoof. "A treatment on the hoof." Dr. J. H. Kendall Co., Endicott Falls, Vt., U.S.A.

B.C. Potatoes
British Columbia potatoes have found ready sale in the Antipodes this year, and we have heard a demand for them there. The city of London, Ontario, consumes between four and five carloads of the tubers every week, and the local supply has been exhausted.—Victoria Colonist.

Nova Scotia Man Has Good News

FINDS IN DODD'S KIDNEY PILLS A CURE FOR HIS RHEUMATISM

States Out of His Own Experience That Dodd's Kidney Pills Are a Sure Relief From Pain.

Grenfield, Queen's Co., N.S.—(Special)—"To anyone who has suffered from rheumatism, take Dodd's Kidney Pills. They will be sure to give you a release from pain." This is the message of Cornelius Hirtle, a well known farmer, who here has been Mr. Hirtle suffered from rheumatism for four years and found a cure in Dodd's Kidney Pills.

"I had bad shape for four years," Mr. Hirtle says in giving his experience. "My back and hips troubled me so much that I was not able to move without suffering pain. I had stiffness in the joints, my muscles cramped and I felt heavy and sleepy after meals. I had a bitter taste in my mouth and was weak in the morning. My appetite was poor and I was often dizzy."

"I suffered from shortness of breath and often slept and I was depressed and low spirited."

"I took six boxes of Dodd's Kidney Pills and they did me so much good that I am recommending them to all my friends. They are better than any doctor."

Every one of Mr. Hirtle's symptoms was a symptom of kidney disease. That's why Dodd's Kidney Pills cured him.

A crocodile in the London Zoological Gardens has died of tuberculosis; the first case known to science.

Sore Granulated Eyes

Eyes inflamed by exposure to Sun, Dust and Wind

A Strange Career

Irish Born, He Fought the British Till the Present War

The London Standard publishes a remarkable story sent by a correspondent upon which rests the responsibility for its accuracy.

On Wednesday, French government announced the death of Capt. Jean Kleber, killed in circumstances providing a fitting end to a career full of romance and adventure. His real name was known only to a small circle of friends. He was the son of a wealthy Belfast merchant and received a good education, went to Trinity College, Dublin, and studying in Germany. He served some years in the Foreign Legion in North Africa and was one of the party serving Major Marchand of the Fashoda mission.

Two years later he took service with the Foreign Legion, went through the whole of the war, subsequently escaping to France, after refusing to surrender his command under the terms of the Armistice.

Two of his more known achievements were the capture of Lord Meath and the cutting up of Gen. Gouraud. After the Boer War "Kleber" returned to the French service, but the belief in an imminent war between Germany and Britain caused him to leave the army and enter the service of the Kaiser's army. His offer was accepted but in 1911 the threat of a German attack led him to return to his old post in the German service. On the outbreak of the present war "Kleber" rejoined the French army.

BABY'S OWN TABLETS GOOD AS GUARANTEED

Mrs. L. Labelle, Kingston, Ont., writes and sends us them as good as advertised. They are certainly a wonderful remedy. The testimonial from other mothers is like that of thousands of other mothers. Once a mother has used Baby's Own Tablets she will use nothing else for her little ones. Tablets are sold by leading dealers or by mail at 25 cents a box from the Dr. Williams' Medicine Co., Brockville, Ont.

Jahbers—I tell you, old man, it's a terrible thing when your wife quarrels with her mother and the old lady lives with you. What would you take?"

Havers—Neither. I preserve an alarmed neutrality.

Corns and warts disappear when treated with Holloway's Corn Cure without leaving a scar.

A decree lately issued by Pope Benedict provides that priests in all countries, at Sunday mass, after reading the Evangel in Latin shall repeat it in the language of their hearers so that the greatest concessions to modernity made by the Vatican.

Minard's Liniment Cures Burns, Etc.

Catching Flies by Electricity

A new device for catching flies is being added to the equipment of a number of hotels in preparation for the summer season. It consists of an electric motor, which draws the flies into a tube. A thin wire of fine platinum or moistened sugar is smeared on the edges to draw them to the vicinity. At the flies alight upon the platinum strips and are then quickly dropped into a steel cage in the bottom of the pipe. This machine has demonstrated an ability to catch flies in a most remarkable manner. It will clear a dry infested room in a few minutes and can be easily carried from one room to another and operated from the power supplying the current for electric light.

The Beauty of a Clear Skin.—The condition of the skin regulates the condition of the blood. A disordered liver causes impurities in the blood and these show themselves in blemishes and spots. Dr. Cassell's Liniment Pills in action upon the liver act upon the blood and a clear, healthy skin will follow intelligent use of the pills. These pills will fully supply this prime quality of the pills, can be used with the certainty that the effect will be most gratifying.

Minard's Liniment Relieves Neuralgia.

Flowers for Children
Educators are appreciating the refining influence of flowers on children. More and more, the schools are taking up school gardening; civic committees are trying to get the cooperation of the gardeners for the beautification of the city. If children are allowed to help in the home garden, they will not only help make, but help keep a home beautiful.

Children should be given flowers that are sure to be a success, lest they get disappointed with frequent disappointments. Only grapes know that to have a garden is to wage constant war against cut-worms and bugs and insects. But the children should grow flowers—tulips, carnations, corn flowers, California poppies, four-o'clocks, larkspur, sweet alyssum, campanula, verbena, canary bird, with a long blooming period; and let them cut the flowers to suit themselves. One plant of each variety will produce a quantity—cost is small, and the reward great.

Tortures of Rheumatism Yield to This Remedy

A Marvel of Speed, an Unfailing Cure for Old Chronic Cases

GET A TRIAL BOTTLE TO-DAY.

With reliable old Nervilene you can rub out the pain of Rheumatism, Sciatica, Lumbar, or Neuralgia—rub it away so completely that you feel like dancing.

It matters not how deeply seated the pain is, or how long you have had it—rubbing with the kind of liniment that is used in the military entrenchments will be followed by the Commonwealth and that this army will number 50,000 men.

"This further contribution," said Mr. Hughes, "will bring the total number of men supplied by Australia by next June to something like 300,000 men."

It is to be understood that this contribution is to be made by the military entrenchments to be adhered to. No requests had been made to the Commonwealth by the Australian government for more men.

The offer was quite spontaneous.

I have not the slightest doubt that the necessary men will be forthcoming.

The cost of new units, and is independent of the quota of 3,000 men necessary for the quota.

A government appeal will be made to the Australian government to increase the size of the army group based on the recent war census—that is, single men from 18 to 44 years.

Friendly Scheme of Australian Airmen

A note has been issued by the military governor of Bologna, warning the inhabitants along the Adriatic coast against infected sweets dropped by balloons.

It was observed during the incursion of enemy aeroplanes at Ravenna and Ancona on February 13 that the Austrian air force dropped little packages from the sky which contained sweets.

Those packages, when analyzed, were found to contain millions of germs of highly contagious diseases.

Extract From a Letter of a Canadian Soldier in France.

To Mrs. R. D. Bambrick,
The Rectory, Yarmouth, N.S.

Death Mother—Anne Keenan, I have been told, has been protected from the weather, but have some difficulty keeping uninvited guests from visiting me. Have you any patriotic thing I can send to her? I am saving up for a gift overseas? If so, do you know something that is good for everybody?

—Old Dr. Minard's Liniment. Try and send some.

Manufactured by the Minard's Liniment Co., Yarmouth, N.S.

When It Comes to That

A cocker angler thinking his Highland boatman was not treating him with respect due to his station, exposed thus:

"Now, Johnny," asked the gentleman who had consented to take the class, "what do you think this fascinating story of John is all about?"

"It teaches us," said Johnny, whose father reads practical articles on practical people, "that you cannot keep a good man down."

Mr. Perkins (with dignity)—"What do you think?"

—Your affectionate son, Rob.

—Manufactured by the Minard's Liniment Co., Yarmouth, N.S.

Debtors, When It Comes to That

you don't seem to grab who I am. You know that my family has been entitled to bear arms for the last 200 years. I am a member of the Minard's Liniment Co., Yarmouth, N.S.

"Hoot! That's naethin," was the reply. "My ancestors have been entitled to bare legs for the last 2,000 years."

Mr. and Mrs. Geo. Lane were visitors to Mr. and Mrs. Mackay, Jr. on Sunday last.

Mr. Wm. Spooner and family visited Mr. W. Mackay, Sr., on Sunday last.

Miss Lavina Mackay spent Sunday at the parental home.

Mr. M. Hanes and family visited at Mr. G. T. Jones' on Sunday.

Elder Oster, of Edmonton, a pastor of the Latter Day Saints denomination is preaching here, and making his home temporarily with Mr. Reese Jones.

Miss Erna Roedler returned to her school after enjoying a week's holiday at home.

Misses Leita Allen and Ethel Livingstone, of Davis District spent Friday evening with Mrs. V. B. Arnold.

Several from this district attended the Box Social at Davis school, and reported it a success. Net proceeds being \$60.

Mr. Niel Faut heard the "call" "Come up higher," and passed away to his eternal reward, on Thursday. "Just another one has entered the pearly gates. There to await and welcome his loved ones. When they too shall join the heavenly throng." The sympathy of the entire district goes out to the bereaved ones.

IN MEMORIAM.**Niel Duncan Laut.**

On May 4th Niel Duncan Laut, the son of Mr. and Mrs. James Laut, breathed his last at the home of his parents, after a long and severe illness.

The funeral took place on Saturday, May 7th, at 11 a.m., the service being conducted by the Rev. Rex Brown, of Cartair, assisted by the Rev. J. P. Berry.

The unprecedentedly large gathering in attendance at the funeral, and the mass of floral tributes, is a marked evidence of the esteem in which he was held, and of the widespread sympathy for the bereaved parents.

The pall bearers were Meers, Reece Jones, Van Arnold, Otto Roedler, Melvin Casey, Dewey Casey and Robert Smart.

The death of Niel Laut, although following upon a protracted illness, came as a great shock to the entire community. In spite of the fact, generally known, that his condition was serious, everybody was buoyed up by the hope that Niel would win back to health and would reap the reward of the plucky fight he was making against sickness. This, however, was not to be, and three days after his return home from the hospital in Calgary he passed very peacefully away at the age of 18½ years.

Niel Laut was particularly well known in the village of Crossfield, where he attended the High School last year. He had matriculated in June, 1915, with a display of ability and moral promise of a brilliant career, and his loss was particularly keenly felt by those of his acquaintances who had held the hope that he would be vouchsafed the health necessary to give scope to his capabilities.

His own chief ambition was that of being able to serve his king and country in the present great crisis, and only the most urgent entreaty prevailed upon him last fall, to delay his enlistment till spring. The great sacrifice was not, however, to be his as he came while he was still physically unfit for service. The spirit, however, was more than willing, and it would indeed be a fitting climax to Neil Laut's life, if the love of God and fire of his country, courageous and patriotic young Canadian should be the means of leading others towards their obvious and bounden duty.

Foreign countries do not support Canadian factories. Why support them? Buy "Made-in-Canada" goods and help Canadians.

MERRICK THOMAS, Druggist

Boosting New "Dry" Battalion

203 Receive Hearty Support or Religious Organizations

The Two Hundred and third Battalion, Canadian Expeditionary Force, in the challenge of the minister of militia, who, when speaking of the many applications for chaplaincies, said that the ministers ought to organize a fighting battalion.

The thought was presented by one of the leading ministers of the city that the resources of church organizations might be more adequately used than they have been for recruiting purposes. It was pointed out that there were nearly four hundred circuits of the Methodist church alone in Military District No. 10, and that while many had already supplied a large number of recruits, others hundreds of recruits, yet there were many who were not directly affected, and it was felt that a large effort might be brought to bear on the problem of recruiting, if these agencies could be organized and directed. A meeting was arranged to make out that an effort might be made to fill up a new battalion, whose chief characteristic would in no way be affected by the religious views representing the thought of the church. It should be a dry battalion. This was very heartily received wherever mentioned, and the men all saluted quarters. Furthermore, it was presented before the Methodist ministerial association, as also before the convention of the Young Men's Christian Association, the Young People's organizations of our province, and Rev. W. B. Caswell, pastor of the Broadway Methodist church, was unanimous in his authorization to present this offer to the minister of militia. Sir Sam Hughes, was heartily received, and the Two Hundred and third was duly authorized, with Lieut.-Colonel J. Hansford as the commanding officer. Mr. McLean was given the position of honorary colonel to assist in directing recruiting and later on to assume the duties of the chaplaincy, and the organization is now about complete.

Lieutenant F. Percy Lloyd, son of Principal Lloyd, of the Emanuel college here, represents the Two Hundred and Third, with headquarters in the Canada building at Saskatoon. In order that the battalion should be represented in every possible of Military District No. 10, Mr. T. W. Fawcett, of Saskatoon, was appointed paymaster. Captain W. H. Green, Mountie, has charge of a recruiting office in that district for Southern Saskatchewan.

The battalion very much appreciates the loan of the Great West Permanent Loan, in placing the top floor of their building at the disposal of the men. The first loan, a good start has been made already upon. A platoon of Wesley boys, the senior side, Lieut. J. A. Carroll and the Royal Templars are organizing a platoon under Lieut. J. H. Kennedy, and they believe that they can even do better than us, and have some ambition for a company.

The young men of Grace church are lining up in effort to put up a platoon. Mr. C. Hill, the young secretary of Brandon, is opening up an office there, and is endeavoring to line up a platoon in that city and surrounding territory. — Winnipeg Telegram.

The House By the Side of the Road

THERE are hermit souls that live withdrawn,
In the shade of their self contained

They are souls, like stars, that dwell apart

In a friendship firmament;
There are plowmen souls that blaze their paths

Where the highways never ran—
But let me live by the side of the road

And be a friend to man.

Let me live in the house by the side of the road

Where the race of men go by—
The men who are good, and the men who are bad

As good and bad as I.

I would not sit, in the scorpion's seat;

Or hang the crows' ban

Let me live in the house by the side of the road

And be a friend to man.

I see from my house by the side of the road

By the side of the highway of life.

The men who press with the ardor of hope;

The men who are faint with the strife

But I turn not away from their smile

Both parts of an infinite plan—

Let me live in my house by the side of the road

And be a friend to man.

Let me live in the house by the side of the road

Where the race of men go by—

They are good, they are bad; they are weak, they are strong;

Wise, foolish—so am I.

Then why should I sit in the scorpion's seat?

Or huri the cynic's ban?

Let me live in the house by the side of the road

And be a friend to man.

—Sam Walter Foss.

Officers of 203rd Battalion, Canadian Expeditionary Force

Demands on the Western Roads

Railway Employees Asking for a Substantial Increase in Wages

The demands being made by organization of railway train service employees on western railways for a 25 per cent. higher pay are and all railroads employees. Their wages range from \$800 to \$1,200 a month, increased to nearly \$400 a year for engineers on the best runs. The average wages of the 200,000 employees are demanded an increase of \$1,263.37 a year, an increase of 40 per cent. since 1904. The 1,400,000 other railway employees average \$848.78 a year, an increase of 22.2 per cent. since 1904.

These are the facts, Mr. Farmer said, when you asked me if they may, if you think the railway train service employees are justified in threatening the prosperity of every industry.

Opposition of individuals dependent for food supply on uninterrupted railroad service?

Mr. Farmer, once upon a time—like the railways—you paid your employees a flat monthly wage. As you till the work was done, no matter how many hours.

Your farm hand followed a plow behind a yoke of oxen, perhaps from town, and replaced the oxen, your employer said.

"There turn more furrows in a day than the oxen, and hereafter I want to be paid by the hour," he said.

"Henceforth I want you to pay me for every day you work, and from

time, either on a time or distance basis, whichever will give me the most money."

Suppose that when you invested more of your capital in a team of horses, you replaced the oxen, your employer said.

"There turn more furrows in a day than the oxen, and hereafter I want to be paid by the hour," he said.

"Henceforth I want you to pay me for every day you work, and from

time, either on a time or distance basis, whichever will give me the most money."

Suppose, further, Mr. Farmer, that from 1904 to 1914 you had increased the wages of your family and from town, and the result was, you said, \$1,653.37.

would you feel like granting his last demand for more wages for doing exactly the same work in the same conditions?

That is precisely the question that the railway managers of this country are now called upon to answer. The men employed in railway train service are asking a 25 per cent. increase in pay for exactly the work they are doing, under the same conditions, except as to pay. As with the farm hand, the working conditions of railway train service men are not so good as those of the farm hand.

The total value of the seed produced from 1910 to 1915 was \$8,000,000,000 for fiber and oilseed.

Mr. Glass declared was as good as any in the world and he urged that special steps should be taken by the government to study the best method of developing this fibre.

In the United States a good deal of attention has been given to the use of the fiber for textiles.

The department of agriculture had already been taking steps along this line.

Mr. Hason added that there was a much bigger demand for the oil in this country than the fiber industry could supply at the present time.

There was also a great demand for paint makers, and others.

Trawler Skipper A Brave Man

He Risked His Own Life to Cut Mine Away to Save Vessel

On the return to port of the Grime by trawler Pelican, a gallant action on the part of the skipper, Fred Firth, was made known.

When the gear was being hove in, it was discovered that a mine was entangled in the warp. The which was immediately stopped and the incoming gear hove in at a rate of 15 bounces lightly on the ship's side. The situation was one of extreme peril, roll or launch the vessel might cause the mine to shift, and to explode at any moment.

Skipper Firth ordered all the hands to the boat. Then, having handed the compass, compass, unhooked the anchor, the crew, he ordered them to pull away from the trawler.

"But what about you, skipper?" one of the men asked.

"I'm going to try and clear that mine," he replied. "The men demand, but Firth insisted. "Pull clear," he said, "Full clear, and if anything happens try and pick me up."

The men pulled clear and then the skipper, having donned a life jacket, set to work slowly and gently un winding the warp until the mine was within inch by inch the mine was lowered, the men in the boat waiting, fearing each moment that the ship would sink and bring about the dreaded explosion.

But luck was with the gallant skipper. The mine touched the vessel and, as it sank, it exploded at 150 feet of water, so that the ship could swing clear of the danger zone. It was his intention to buoy the place so that mine sweepers could find the mine and before that could be done there was a terrific explosion which shook the trawler and practically swamped the boat.

The mine had either burst on the anchor or been fouled by the gear, for when the warp was hauled again there was nothing but wreckage at the end of it.

Women Munition Workers

Remarkable Achievements of Women Workers in Munition Factories

In a munition factory in Victoria where the dilution of labor has resulted in a happy co-operation between men and women, the girls are turning out gun-barrel work—perhaps the most exacting of all munition work.

A man gets her machine and she completes the body of a barrel. She starts with a blank in which there has to continue dead true through twelve inches of steel. In this work the man's dexterity of touch and the woman's great use of touch, the unskilled man, the test is the tally of broken tools, and this woman, who was previously a charwoman, has as yet a clean sheet.

An short distance away is a woman who has become surprisingly proficient at slot drilling—a process in which she is the equal of the men.

Still more women in this shop are able to take over bigger work from the men, with the assistance of their husbands, in the kitchen. There is a woman, too, who is able to do her own tool setting. She is probably the only woman to have started in the country and, up to efficiency she has been the knowledge that she is aiding in an indirect way the efforts of her husband at the front.

The men, too, are in the same works. The country will be in a position soon to send 2,000 bombs a week more to the trenches from this shop alone.

How women came into these works is a lesson in the evolution of art and trade. The provision of the war, his men. He called his men together, told them that the outfit had to be doubled, and that men or women would have to go to work. That was much teacher to the doors. Per

haps the workers would like to find men workers. They said they would.

They can add that sending a woman worker with men. "You must look after them," said the employer, "and you must all put your backs into it." That day to this, said the employee, things have gone perfectly.

No part of the work is easier than the welding and the making of the gages alone entails an outlay of a hundred pounds or more. Women have been known to work together with one or two men, and skilled men engaged remaining the same.

"But," said the managing director, "where I was with a partner, we get only a week a month now getting thirty. I have been told by the authorities that I am making them better than any other place."

The achievements of the women in these works are the more remarkable in view of the fact that they are entirely of general engineering, and rarely maintain the same job for more than three days.

Could Hardly Live for Asthma writes one man, who, after years of suffering, has found complete relief through Dr. J. D. Kellogg's Asthma Remedy. Now he is well again and has been rid of his suffering. This matches remedy gives sure help to all afflicted with asthma. Inhaled as an inhaler, it rapidly relieves the long-needed. Every dealer has it or can get it for you from his whole saler.

Start Alcohol Plant Brewery May Be Turned Into a Manufacturing Business

A few months ago Alberts goes dry. Consequently, the brewer is looking off a solution of their problem. Managing Director Slick of the Lethbridge Brewing and Malting Co., has been in touch with the industry to fit in with the plant now in use which is worth about half a million dollars. The present production of beer is to be used in the manufacture of alcohol for power purposes, the product to be manufactured out of potatoes from which beer is produced at 25 cents a gallon. With gasoline steadily rising, Mr. Slick thinks that alcohol will prove popular if the manufacturers would find a ready market.

That grain alcohol may be used as a substitute for gasoline because of the soaring price of the latter, is proposed by the former products laboratory at Madison, Wis. The government has been conducting experiments along this line for the past year. Gasoline is selling at 27 cents to 30 cents in New York. Grain-alcohol can be produced at from 13 cents to 15 cents a gallon.

Mr. Neils is submitting the complete details of the results of the experiments to the federal government, and also to the manufacturers in the United States. From one ton a sawdust laboratory produces 25 gallons of 95 per cent. alcohol.

No Singing on British Warships

Fate in Store for Lion's Sailors Whose Singing Makes Orders Inaudible

An order for silence on board British warships during battle is expected to be given, unless it already has not been given, by the admiralty.

Fison Young, the novelist, who has been attached to the staff of the Daily Mirror, a newspaper in London, since the beginning of the war, revealed the cause of the departure in London.

Young said that after the Heligoland action in which a German armoured cruiser Blucher sank, and the Lion had been safely towed to port, the chief stoker went to the engineer-lieutenant to lodge a complaint.

"I want you to issue an order for absolute silence among the stokers during the action. During yesterday's battle, the roar of our engines was so loud that it was impossible for me to give orders."

Young then related the remark of the engineer-lieutenant, half stunned, with a shell bursting below the water-line, casually remarked to a comrade: "This means death! King come or ten days' leave."

Protection of Wild Life

Some Measures Essential to the Conservation of Canada's Wild Birds and Animals

If the wild life of Canada is to receive the protection it deserves, several important steps must be taken with the least possible delay. The following measures are not mentioned in order of their relative importance, for each of them is essential to a complete system of protection and protection of the whole earth advocacy of environmental criticism.

(1) Careful revision of the provincial acts governing the protection of insectivorous birds, to ensure that no new species are included on the "black list."

(2) Negotiation of a migratory bird treaty between Canada and the United States.

(3) The selection of suitable areas throughout Canada, and their erection as national parks.

(4) Adequate protection for the birds of the Atlantic coast.

(5) Close restriction and, where feasible, total prohibition of the sale of game.

(6) Thorough revision of the Northwest Game Act and provision for its strict enforcement.

(7) Organization of strong, independent societies to create a public opinion of sufficient strength to obtain and enforce proper protective laws.

Enforce the Blockade

Admiral Lord Beresford recently wrote:

"If the government had used our sea power as they were legally entitled to do, to stop the German reserves proceeding to Germany, an effective blockade, and making all goods entering Germany absolute contraband. This is acknowledged by the foreign office. Every difficulty and every asterisk we have met has been brought about by our desire to be overcautious. Public agitation and the press have been the means of forcing the government to take up the following course: the blockade of the ports of alien enemies, the Trading with the Enemy Act, placing cotton on the control list, and the Alien Restriction Act, and the stoppage of German reserves proceeding to Germany. Public agitation will probably compel the government to make a fuller and more effective blockade of the ports of alien enemies, the Trading with the Enemy Act, placing cotton on the control list, and the Alien Restriction Act, and the stoppage of German reserves proceeding to Germany. Public agitation will probably compel the government to make a fuller and more effective blockade of the ports of alien enemies, the Trading with the

Enemy Act, placing cotton on the control list, and the Alien Restriction Act, and the stoppage of German reserves proceeding to Germany. Public agitation will probably compel the government to make a fuller and more effective blockade of the ports of alien enemies, the Trading with the

Enemy Act, placing cotton on the control list, and the Alien Restriction Act, and the stoppage of German reserves proceeding to Germany. Public agitation will probably compel the government to make a fuller and more effective blockade of the ports of alien enemies, the Trading with the

Enemy Act, placing cotton on the control list, and the Alien Restriction Act, and the stoppage of German reserves proceeding to Germany. Public agitation will probably compel the government to make a fuller and more effective blockade of the ports of alien enemies, the Trading with the

Enemy Act, placing cotton on the control list, and the Alien Restriction Act, and the stoppage of German reserves proceeding to Germany. Public agitation will probably compel the government to make a fuller and more effective blockade of the ports of alien enemies, the Trading with the

**LADY
URSULA'S
HUSBAND**

BY
FLORENCE WARDEN

Ward, Lock & Co., Limited
TORONTO

(Continued)

But this statement of opinion on the part of the detective roused Lord Eastling to fury. It was with difficulty that he was restrained by his companion from rushing back to the station to make a formal protest, and from making known to the officials that he was engaged on a man hunt.

The persuasive voice at his ear would not be quieted.

"Now, then, my lord, pull yourself together. You mustn't lose your head now, whatever you do."

"I'll get him, I'll drop him," panted Lord Eastling hoarsely.

"I'm afraid, lord. He'll get away, but he's sure of that. It'll be guided by time."

Rather because he had to plan on his own, than from any lack of interest on the part of the detective, Lord Eastling listened, as he was asked to do. After all, Redding was his only friend, and on him he could depend. He had been allowed to get away at their ease, and the whole terrible story of Paul Payne's misdeeds would have been told to him, and he had been given the result of a journey which began to appear to him in the light of a wild goose chase.

The most unexpected, most unexpected, he caught the flutter of a long, loose black cloak on a tall, erect female figure, and he breathed a sigh of relief when he saw that it was his sister, Lady Ursula.

Long before he could come up with her, she had gone into a closed cab, and Paul Payne had shut himself with her.

Lord Eastling drew back, started.

But a nod and an expressive look from the detective half-reassured him, and he got into the vehicle obediently.

Then Redding got in beside him, gave him an expressive wind in answer to his astonished protest, and said:

"We must let them think we've given up the chase."

"'Tis—what?" stammered the bewildered Redding.

"Tomkinson saw me, and he saw me speak to you, and I expect he made up his mind to go by the next train. But now, if I'm not mistaken, he's certain he won't want a scandal till he's made his confession. And don't his disappearance betray him?"

"What am I to do?" he stammered.

He was amazed to find that he had given his name to a tourist, and that he had to be held by the arm led him out of the crowd, and opening the door of a taxicab, invited the viscount to jump in.

Lord Eastling drew back, started. But a nod and an expressive look from the detective half-reassured him, and he got into the vehicle obediently.

Then Redding got in beside him, gave him an expressive wind in answer to his astonished protest, and said:

"We must let them think we've given up the chase."

"'Tis—what?" stammered the bewildered Redding.

"Tomkinson saw me, and he saw me speak to you, and I expect he made up his mind to go by the next train. But now, if I'm not mistaken, he's certain he won't want a scandal till he's made his confession. And don't his disappearance betray him?"

"What am I to do?" he stammered.

"You're only taking a turn to fill up time. If you'd met him in the train and tried to do something, they'd have sent for the police. No, he can't afford that nor can we. For, after all, he may be really your brother-in-law by this time, you know."

This most distasteful thought was indeed ever present to the viscount. "That won't do much good," he said to himself, "for Lady Ursula certainly would acknowledge a criminal as her husband."

"You mustn't reckon on anything before a lady is concerned," said the official.

"But where are we driving to?"

"We're only taking a turn to fill up time. If you'd met him in the train and tried to do something, they'd have sent for the police. No, he can't afford that nor can we. For, after all, he may be really your brother-in-law by this time, you know."

And, without stopping to inquire why he had come, she ran forward to kiss him. It was the action of a half-witted woman, who, when she is absolutely serene, who fears no ill, absorbed in her new-found happiness. He looked down at her, that clear blue eyes, and when she gazed at him as he gazed at her. Then he flung his arms round her, and murmured hoarsely:

"Thank God, thank God I've got you!"

"Even then she had no suspicion; her pure mind was incapable of harboring such thoughts. She was still under her brother's almost theatrical embraces and exclamations nothing but a source of surprise.

"Good Tom, why didn't you come with us, if you wanted to be with us so badly?" she asked with a happy smile, which faded suddenly from her countenance, as she turned to share her amusement with her husband, she saw that Paul was standing stiff and straight, at a little distance, with a look of marked annoyance on his face.

Lord Eastling's eyes met those of Paul, and he said:

"I want to speak to you, Payne," he said, "by yourself."

He had disengaged himself from his sister, and he was now, for the first time, conscious of the difference.

"What is it, Tom?" she cried gently.

"No, no, there's all right. Don't look at me like that. Come into the next room and let us talk."

"But why, why? What can you have to say that I can't hear here?"

"I am sure, that I can't hear here." She turned, with a smile of infinite tenderness, to her husband.

"But you have to secrets from me."

She turned, with a smile of infinite tenderness, to her husband.

"But you have to secrets from me."

Production and Thrift

CANADA'S CALL FOR SERVICE AT HOME

Produce More and Save More

The Empire needs food. If you are not in the fighting line you may be in the producing line. Labour is limited—all the more reason to do more than ever before. Grow food for the men who are fighting for you. The Allies need all the food that you can produce. Every little helps. You are responsible for your own work. If you cannot produce as much as you would like, produce all you can. Work with the right spirit. Put fighting energy into your effort and produce now when it counts. The more you produce the more you can save. Producing and saving are war-service.

Make Your Labour Efficient

In war-time do not waste time and energy on unimportant and unprofitable work. Economize labour. Put off unproductive work till after the war, and, if possible, help in producing something needed now. Let us not waste labour. Canada needs it all. If possible help to feed the Allies. Make your backyard a productive garden. Cultivate it with a will. Make your labour count for as much as possible.

Do Not Waste Materials

There should be no waste in war-time. Canada could not afford to interest on her war expenditure out of which we waste our farms, in our factories, in our homes. Every pound of food saved from waste is as good as a pound of increased production. The way for a nation to save is for every individual to save. France is strong to-day because of thrift in time of peace. The men and women of Great Britain are not only "doing" but are learning to "do without."

Spend Your Money Wisely

Practise economy in the home by eliminating luxuries. Wasting our dollars here weakens our strength at the Front. Your savings will help Canada to finance the war. Save your money for the next Dominion War issue. There can be no better investment.

THE GOVERNMENT OF CANADA

THE DEPARTMENT OF AGRICULTURE

THE DEPARTMENT OF FINANCE

CROSSFIELD, ALTA., MAY 11, 1916

The Poultry Raisers' Opportunity.

From present indications Great Britain will require all the eggs and poultry Canada can produce during 1916. Last year as a result of greatly increased production, Canada was able to ship to Great Britain the largest quantity of eggs exported since 1902, and at the same time reduced her imports for home consumption by nearly a million dozen.

Canadian eggs have found favour on the British market, and the prospects are that, providing they are available, much larger quantities will be shipped this year. The unusually high prices prevailing at the present time are largely due to this anticipated export demand.

Prices for poultry are also high, and will likely continue so for the rest of the season. Last fall and winter all the surplus Canadian poultry was exported at highly profitable prices. Between fifty and sixty cars of live poultry were shipped from Western Ontario to the Eastern States alone, and in the Maritime Provinces, particularly in Prince Edward Island, the export demand for canned poultry has greatly enhanced prices to producers.

Although some uneasiness has existed on the part of the trade as regards transportation facilities in view of the high freight rates and the shortage of boats, it is now reasonably certain that an even greater demand for Canadian poultry and eggs will occur this year. It is important, therefore, that every poultry producer takes steps to profitably, by hatching as many chicks as possible this spring.

Now is the time, by hatching early, by hatching everything possible in the month of May, to guard against the marketing of so much small, under-sized, poorly finished

poultry, which annually becomes a drug on the market in the fall of the year. Again it is only by hatching now, and giving the chickens every possible chance to thrive and grow, that a maximum supply of eggs can be obtained in the winter time.

Given their proportionate amount of attention, the growing of poultry brings quick and profitable returns to the farmer. With the increasing cost of meats, milk, butter, etc., there is a constantly increasing demand for poultry and eggs. The labour problem is not critical, the boys and girls on the farm can readily take care of the poultry, the cost of feed is nominal, prices for poultry and eggs are high, the highest in fact for many years. It is obvious, therefore, that Canadians have a patriotic, as well as an economic duty to perform in making the year 1916 the banner year for poultry production in Canada.

Good For Scotty.

A British soldier being badly in want of sleep one night became unable to supply his needs, hit upon a plan.

Under cover of darkness he crept out of the trench in search of the needed footgear; he did not go far before he came across a German soldier and quickly dispatched him, and the dead man being the possessor of good boots they were soon transferred to Tommy's feet, and he quietly crawled back to his place in the trench.

He was now the only one who could boast of being so well provided in regard to foot gear. One burly Scotman said he would go to the aid of his comrade and pull off his own boot. He set out in high glee in search of a pair of boots. The first day passed, also the second, and Scotty had not returned. His comrades gave him up as lost, and notified his absence. On the third night Scotty came back covered all over with mud, but with one big smile on his face. His comrades were delighted and more than pleased to see him back. "Where have you been all this time?" asked his mate. "Why, you know I went out in search of a pair of boots, and I had to wade to hash of 35 Germans before I could find a pair to fit me. I had a pretty hard job to find a size 18's."

AUCTION SALES.

"THE LAND TITLES ACT."

In the matter of the Land Titles Act and Amending Acts, and in the matter of that certain Mortgage (No. 34351, x.) made by Gottfried L. Karapp to Minnie Moore Fawcett covering the South-West Quarter of Section (23) Twenty-Three in Township Twenty-Eight (28), Range One (1) West of the Fifth Meridian in the Province of Alberta.

ADVERTISEMENT

MORTGAGE SALE OF PROPERTY
Subject to the directions of the Regents and by virtue of the Power of Sale provided by The Land Titles Act, under a certain mortgage which will be produced at the time of sale.

There will be offered for Sale by Public Auction, at the Alberta Hotel, in the Village of Crossfield, in the Province of Alberta, on Wednesday, the Seventeenth day of May, 1916, at the hour of Two-Thirty o'clock in the afternoon, the following property, namely: the South-West Quarter of Section Twenty-Three (23) Township Twenty-eight (28) Range One (1) West of the Fifth Meridian in the Province of Alberta.

Terms of sale to be 20 per cent. cash at time of the sale and the balance according to the terms and conditions to be made known at the time of sale or upon application to the vendor's solicitors.

The above property will be offered for sale subject to a sealed reserve bid and free from all encumbrances, save: any seed grain field that may be outstanding, and taxes for the current year.

The vendor is informed that the above property is situated about 1½ miles from the village of Crossfield, in the Province of Alberta, and that the land is slightly rolling, fifteen (15) acres good only for pasture and hay and 20 acres coarse. The soil is black loam mixed with gumbo and subsoil is clay. There are no buildings on the property and none of the land is under cultivation.

For further particulars and conditions of sale apply to McLEAN, PATTERSON and BROAD, Vendor's Solicitors, Calgary, Alberta.

Dated at Calgary, in the Province of Alberta, this fourth day of April, A.D. 1916.

MCLEAN, PATTERSON & BROAD,
Approved Vendor's Solicitors.
"A. T. Kinnaird,"
Deputy Registrar.
